7/23	Nolan Family Picnic
7/30	Amy Rice Book Signing

Events:

Mingo and Trivia continued to be a great success with Mingo filling all tables.

Erik Schreiber, owner of CustomFit360 in Millville, presented a fantastic and informative three-week exercise clinic focused on healthy aging and simple daily workout plans to help participants stay active and independent. Melissa Kilker, General Manager, also provided a hands-on demonstration showing participants how to safely and effectively use the exercise equipment at Evans Park.

The yoga classes attract a steady group of regular participants, creating a welcoming and supportive environment for all fitness levels.

Tim Cooper, Deputy Director of Public Safety – Emergency Management, held a meeting to discuss the possible use of the Millville Community Center as a temporary shelter during severe weather emergencies. The Community Center could serve as a safe location where displaced residents can stay for a few hours while emergency personnel and the Red Cross coordinate and arrange further assistance.

Upcoming Events:

Bike Rodeo: On August 5th we are hosting a Bike Safety event in partnership with Sussex Cyclists. Families are invited to bring their bikes for free safety checks and minor adjustments performed by a bike mechanic. Free bicycle helmets and bike lights will be available while supplies last. The event will also feature a magician and free snow cones.

Stuff The Bus: The Town of Millville is partnering with Jolly Trolley to host a Stuff the Bus donation drive benefiting the volunteer organization Clothing Our Kids. This community effort will help provide new back-to-school clothing for Sussex County children in need, by donating new clothing items for school-aged children.

Park Maintenance & Operations:

Continued routine maintenance including mowing, trash removal, and equipment inspections. Jeff Harmon, our service technician from Heart To Beat, performed his monthly inspection and maintenance check on both AED boxes. The parking lot was freshly re-striped and new handicapped parking stencils have been painted in the designated accessible parking spaces to improve visibility and accessibility for visitors.

Projects & Improvements:

Irrigation System and Landscaping: The irrigation system was installed around the pickleball courts, and the landscaping is in progress.
